

East Coast Combinatorics Conference 2006

Report

The East Coast Combinatorics Conference was held on April 1st and 2nd in Charlottetown, PEI. This annual conference is primarily designed to bring together local mathematicians interested in combinatorics and graph theory.

The conference was attended by about 20 researchers. Invited lectures were given by Dr Penny Haxell, University of Waterloo, Dr Bert Hartnell, Saint Mary's University and Dr Hugh Thomas, University of New Brunswick. In addition to these invited lectures, there were eight contributed talks.

It was successful weekend and a great opportunity for the local combinatorics community to get together. All are looking forward to doing it again next year.
